## Introduction

Why are the rich rich and the poor poor? Why do not the rich become poor and the poor rich? What is it, luck or fate? Does it depend on the person himself? How, finally, to become rich? Is it possible for a simple person, a man without ties? The author of the test asserts that the cause of poverty or wealth are the internal attitudes of a person that can be changed. This is the focus of this test. Each participant with his help can determine his available attitudes towards accepting or rejecting money. In the recommendation part, the Test provides each person with simple and necessary recommendations for changing the settings and guarantees (with the actual application of the recommendations) that the person will indeed become richer.

Below are questions and 5 possible answers for each of them with scores from one to five. Answer all questions and sum up the number of points received. The number that you will get, check with the data published in the last chapter of the book, which is called the «Results of the test.» By the number of points you will be able to identify yourself, find in a certain group. Moreover, if you are interested, you will receive specific recommendations in order to increase the flow of money for yourself in your situation.

Everything is very simple. The test will not take much time. His results (hopefully) will please you. The accuracy of the received characteristics for this test is guaranteed by the breadth of its coverage and the author's experience. Want to have a lot of money – so get them!

If there is not one among the proposed answers that exactly suits you, choose the option nearest to it.
