**GENERAL ORDERS**

*HORSE GUARDS, 1st January, 1836.*

His Majesty has been pleased to command, that, with a view of doing the fullest justice to Regiments, as well as to Individuals who have distinguished themselves by their Bravery in Action with the Enemy, an Account of the Services of every Regiment in the British Army shall be published under the superintendence and direction of the Adjutant-General; and that this Account

shall contain the following particulars, viz.,

- The Period and Circumstances of the Original Formation of the Regiment; The Stations at which it has been from time to time employed; The Battles, Sieges, and other Military Operations, in which it has been engaged, particularly specifying any Achievement it may have performed, and the Colours, Trophies, &c., it may have captured from the Enemy.

- The Names of the Officers, and the number of Non-Commissioned Officers and Privates, Killed or Wounded by the Enemy, specifying the Place and Date of the Action.

- The names of those Officers, who, in consideration of their Gallant Services and Meritorious Conduct in Engagements with the Enemy, have been distinguished with Titles, Medals, or other Marks of His Majesty's gracious favour.

- The Names of all such Officers, Non-Commissioned Officers and Privates as may have specially signalized themselves in Action.

And,

- The Badges and Devices which the Regiment may have been permitted to bear, and the Causes on account of which such Badges or Devices, or any other Marks of Distinction, have been granted.

By Command of the Right Honourable

*GENERAL LORD HILL,*  
*Commanding-in-Chief.*  
*John Macdonald.*  
*Adjutant-General.*

# PREFACE

The character and credit of the British Army must chiefly depend upon the zeal and ardour by which all who enter into its service are animated, and consequently it is of the highest importance that any measure calculated to excite the spirit of emulation, by which alone great and gallant actions are achieved, should be adopted.

Nothing can more fully tend to the accomplishment of this desirable object than a full display of the noble deeds with which the Military History of our country abounds. To hold forth these bright examples to the imitation of the youthful soldier, and thus to incite him to emulate the meritorious conduct of those who have preceded him in their honourable career, are among the motives that have given rise to the present publication.

The operations of the British Troops are, indeed, announced in the "London Gazette," from whence they are transferred into the public prints: the achievements of our armies are thus made known at the time of their occurrence, and receive the tribute of praise and admiration to which they are entitled. On extraordinary occasions, the Houses of Parliament have been in the habit of conferring on the Commanders, and the Officers and Troops acting under their orders, expressions of approbation and of thanks for their skill and bravery; and these testimonials, confirmed by the high honour of their Sovereign's approbation,

constitute the reward which the soldier most highly prizes.

It has not, however, until late years, been the practice (which appears to have long prevailed in some of the Continental armies) for British Regiments to keep regular records of their services and achievements. Hence some difficulty has been experienced in obtaining, particularly from the old Regiments, an authentic account of their origin and subsequent services.

This defect will now be remedied, in consequence of His Majesty having been pleased to command that every Regiment shall in future keep a full and ample record of its services at home and abroad.

From the materials thus collected, the country will henceforth derive information as to the difficulties and privations which chequer the career of those who embrace the military profession. In Great Britain, where so large a number of persons are devoted to the active concerns of agriculture, manufactures, and commerce, and where these pursuits have, for so long a period, been undisturbed by the *presence of war*, which few other countries have escaped, comparatively little is known of the vicissitudes of active service, and of the casualties of climate, to which, even during peace, the British Troops are exposed in every part of the globe, with little or no interval of repose.

In their tranquil enjoyment of the blessings which the country derives from the industry and the enterprise of the agriculturist and the trader, its happy inhabitants may be supposed not often to reflect on the perilous duties of the soldier and the sailor, – on

their sufferings, – and on the sacrifice of valuable life, by which so many national benefits are obtained and preserved.

The conduct of the British Troops, their valour, and endurance, have shone conspicuously under great and trying difficulties; and their character has been established in Continental warfare by the irresistible spirit with which they have effected debarkations in spite of the most formidable opposition, and by the gallantry and steadiness with which they have maintained their advantages against superior numbers.

In the official Reports made by the respective Commanders, ample justice has generally been done to the gallant exertions of the Corps employed; but the details of their services, and of acts of individual bravery, can only be fully given in the Annals of the various Regiments.

These Records are now preparing for publication, under His Majesty's special authority, by Mr. Richard Cannon, Principal Clerk of the Adjutant-General's Office; and while the perusal of them cannot fail to be useful and interesting to military men of every rank, it is considered that they will also afford entertainment and information to the general reader, particularly to those who may have served in the Army, or who have relatives in the Service.

There exists in the breasts of most of those who have served, or are serving, in the Army, an *Esprit de Corps* – an attachment to everything belonging to their Regiment; to such persons a narrative of the services of their own Corps cannot fail to prove

interesting. Authentic accounts of the actions of the great, the valiant, the loyal, have always been of paramount interest with a brave and civilized people. Great Britain has produced a race of heroes who, in moments of danger and terror, have stood "firm as the rocks of their native shore;" and when half the World has been arrayed against them, they have fought the battles of their Country with unshaken fortitude. It is presumed that a record of achievements in war, – victories so complete and surprising, gained by our countrymen, our brothers, our fellow-citizens in arms, – a record which revives the memory of the brave, and brings their gallant deeds before us, will certainly prove acceptable to the public.

Biographical memoirs of the Colonels and other distinguished Officers will be introduced in the Records of their respective Regiments, and the Honorary Distinctions which have, from time to time, been conferred upon each Regiment, as testifying the value and importance of its services, will be faithfully set forth.

As a convenient mode of Publication, the Record of each Regiment will be printed in a distinct number, so that when the whole shall be completed, the Parts may be bound up in numerical succession.

# INTRODUCTION

The ancient Armies of England were composed of Horse and Foot; but the feudal troops established by William the Conqueror in 1086, consisted almost entirely of Horse. Under the feudal system, every holder of land amounting to what was termed a "knight's fee," was required to provide a charger, a coat of mail, a helmet, a shield, and a lance, and to serve the Crown a period of forty days in each year at his own expense; and the great landholders had to provide armed men in proportion to the extent of their estates; consequently the ranks of the feudal Cavalry were completed with men of property, and the vassals and tenants of the great barons, who led their dependents to the field in person.

In the succeeding reigns the Cavalry of the Army was composed of Knights (or men at arms) and Hobiliers (or horsemen of inferior degree); and the Infantry of spears and battle-axe men, cross-bowmen, and archers. The Knights wore armour on every part of the body, and their weapons were a lance, a sword, and a small dagger. The Hobiliers were accoutred and armed for the light and less important services of war, and were not considered qualified for a charge in line. Mounted Archers<sup>1</sup> were also introduced, and the English nation eventually

---

<sup>1</sup> In the 14th year of the reign of Edward IV. a small force was established in Ireland by Parliament, consisting of 120 Archers on horseback, 40 Horsemen, and 40 Pages.

became preeminent in the use of the bow.

About the time of Queen Mary the appellation of "*Men at Arms*" was changed to that of "*Spears and Launces*." The introduction of fire-arms ultimately occasioned the lance to fall into disuse, and the title of the Horsemen of the first degree was changed to "*Cuirassiers*." The Cuirassiers were armed *cap-à-pié*, and their weapons were a sword with a straight narrow blade and sharp point, and a pair of large pistols, called petronels; and the Hobiliers carried carbines. The Infantry carried pikes, matchlocks, and swords. The introduction of fire-arms occasioned the formation of Regiments armed and equipped as infantry, but mounted on small horses for the sake of expedition of movement, and these were styled "*Dragoons*;" a small portion of the military force of the kingdom, however, consisted of this description of troops.

The formation of the present Army commenced after the Restoration in 1660, with the establishment of regular corps of Horse and Foot; the Horsemen were cuirassiers, but only wore armour on the head and body; and the Foot were pikemen and musketeers. The arms which each description of force carried, are described in the following extract from the "Regulations of King Charles II.," dated 5th May, 1663: —

"Each Horseman to have for his defensive armes, back, breast, and pot; and for his offensive armes, a sword, and a case of pistolls, the barrells whereof are not to be undr. foorteen inches in length; and each Trooper of Our Guards to have a carbine besides

the aforesaid armes. And the Foote to have each soldier a sword, and each pikeman a pike of 16 foote long and not undr.; and each musqueteer a musquet with a collar of bandaliers, the barrell of which musquet to be about four foote long and to containe a bullet, fourteen of which shall weigh a pound weight<sup>2</sup>."

The ranks of the Troops of Horse were at this period composed of men of some property – generally the sons of substantial yeomen: the young men received as recruits provided their own horses, and they were placed on a rate of pay sufficient to give them a respectable station in society.

On the breaking out of the war with Holland in the spring of 1672, a Regiment of Dragoons was raised<sup>3</sup>; the Dragoons were placed on a lower rate of pay than the Horse, and the Regiment was armed similar to the Infantry, excepting that a limited number of the men carried halberds instead of pikes, and the others muskets and bayonets; and a few men in each troop had pistols; as appears by a warrant dated the 2nd of April, 1672, of which the following is an extract: —

"Charles R.

"Our will and pleasure is, that a Regiment of Dragoones which we have established and ordered to be raised, in twelve Troopes of fourscore in each beside officers, who are to be under the command of Our most deare and most intirely beloved Cousin Prince Rupert, shall be armed out of

---

<sup>2</sup> Military Papers, State Paper Office.

<sup>3</sup> This Regiment was disbanded after the Peace of 1674.

Our stoares remaining within Our office of the Ordinance, as followeth; that is to say, three corporalls, two serjeants, the gentlemen at armes, and twelve soldiers of each of the said twelve Troopes, are to have and carry each of them one halbard, and one case of pistolls with holsters; and the rest of the soldiers of the several Troopes aforesaid, are to have and to carry each of them one matchlocke musquet, with a collar of bandaliers, and also to have and to carry one bayonet<sup>4</sup>, or great knife. That each lieutenant have and carry one partizan; and that two drums be delivered out for each Troope of the said Regiment<sup>5</sup>."

Several regiments of Horse and Dragoons were raised in the first year of the reign of King James II.; and the horsemen carried a short carbine<sup>6</sup> in addition to the sword and pair of pistols: and in a Regulation dated the 21st of February, 1687, the arms of the Dragoons at that period were commanded to be as follows: —

"The Dragoons to have snaphanse musquets, strapt, with bright barrels of three foote eight inches long, cartouch-boxes, bayonetts, granado pouches, buckets, and hammer-hatchetts."

After several years' experience, little advantage was found to accrue from having Cavalry Regiments formed almost exclusively for engaging the enemy on foot; and, the Horse having

---

<sup>4</sup> This appears to be the first introduction of *bayonets* into the English Army.

<sup>5</sup> State Paper Office.

<sup>6</sup> The first issue of carbines to the regular Horse appears to have taken place in 1684; the Life Guards, however, carried carbines from their formation in 1660. — *Vide* the 'Historical Record of the Life Guards.'

laid aside their armour, the arms and equipment of Horse and Dragoons were so nearly assimilated, that there remained little distinction besides the name and rate of pay. The introduction of improvements into the mounting, arming, and equipment of Dragoons rendered them competent to the performance of every description of service required of Cavalry; and, while the long musket and bayonet were retained, to enable them to act as Infantry, if necessary, they were found to be equally efficient, and of equal value to the nation, as Cavalry, with the Regiments of Horse.

In the several augmentations made to the regular Army after the early part of the reign of Queen Anne, no new Regiments of Horse were raised for permanent service; and in 1746 King George II. reduced three of the old Regiments of Horse to the quality and pay of Dragoons; at the same time, His Majesty gave them the title of First, Second, and Third Regiments of *Dragoon Guards*: and in 1788 the same alteration was made in the remaining four Regiments of Horse, which then became the Fourth, Fifth, Sixth, and Seventh Regiments of *Dragoon Guards*.

At present there are only three Regiments which are styled *Horse* in the British Army, namely, the two Regiments of Life Guards, and the Royal Regiment of Horse Guards, to whom cuirasses have recently been restored. The other Cavalry Regiments consist of Dragoon Guards, Heavy and Light Dragoons, Hussars, and Lancers; and although the long musket and bayonet have been laid aside by the whole of the Cavalry,

and the Regiments are armed and equipped on the principle of the old Horse (excepting the cuirass), they continue to be styled Dragoons.

The old Regiments of Horse formed a highly respectable and efficient portion of the Army, and it is found, on perusing the histories of the various campaigns in which they have been engaged, that they have, on all occasions, maintained a high character for steadiness and discipline as well as for bravery in action. They were formerly mounted on horses of superior weight and physical power, and few troops could withstand a well-directed charge of the celebrated British Horse. The records of these corps embrace a period of 150 years – a period eventful in history, and abounding in instances of heroism displayed by the British troops when danger has threatened the nation, – a period in which these Regiments have numbered in their ranks men of loyalty, valour, and good conduct, worthy of imitation.

Since the Regiments of Horse were formed into Dragoon Guards, additional improvements have been introduced into the constitution of the several corps; and the superior description of horses now bred in the United Kingdom, enables the commanding officers to remount their regiments with such excellent horses, that, whilst sufficient weight has been retained for a powerful charge in line, a lightness has been acquired, which renders them available for every description of service incident to modern warfare.

The orderly conduct of these Regiments in quarters has gained

the confidence and esteem of the respectable inhabitants of the various parts of the United Kingdom in which they have been stationed; their promptitude and alacrity in attending to the requisitions of the magistrates in periods of excitement, and the temper, patience, and forbearance which they have evinced when subjected to great provocation, insult, and violence from the misguided populace, prove the value of these troops to the Crown, and to the Government of the country, and justify the reliance which is reposed on them.

# ON THE INSTITUTION OF LIGHT CAVALRY IN THE BRITISH ARMY

The records of the military events of the remote ages speak of heavy-armed horsemen being accompanied by others mounted and equipped for light services. The Barons and Knights, who rode the powerful horses celebrated by historians, and took the field completely cased in steel, had a few light-armed attendants; the feudal horsemen were variously armed; and the practice of employing Light, as well as Heavy Cavalry, was adopted, to a limited extent, by several commanders of antiquity. Armour, proof against arrow, lance, and sword, and men and horses of colossal appearance, in whom the greatest amount of weight and physical power, consistent with a moderate share of activity, could be combined, were however held in the highest estimation; but eventually the great advantage of having a portion of Cavalry in which lightness, activity, and celerity of movement, might form the principal characteristics, was discovered. The introduction of fire-arms occasioned armour to be gradually laid aside, or limited to a few heavy horsemen; superiority of weight was no longer thought so necessary; and in the seventeenth and eighteenth centuries the use of Light Cavalry became more general than formerly.

During the seventy years' war between Spain and the

United Provinces of the Netherlands, Prince Maurice of Nassau (afterwards Prince of Orange) selected a few English and Dutch heavy-armed Lancers, and constituted them *Carabineers*, for skirmishing, and other services of a similar character. The Emperor of Germany formed regiments of Hungarian *Hussars*, who were light men on small horses. The Carabineers were of an intermediate class, being much heavier than the Hussars, and lighter than the English Lancers and Cuirassiers, who rode powerful horses, and wore armour on the head, body, and limbs. The French monarchs adopted the practice of having a few Carabineers in each troop of Horse; and, in 1690, Louis XIV. added a troop of Carabineers to each Regiment of Cavalry. During the campaign of 1691, these troops formed a Carabineer brigade; but their motley appearance, and the defects of the plan, occasioned them to be constituted a regiment of Carabineers, and clothed in blue. In 1693 the French King added a regiment of Hussars to the Cavalry of his army.<sup>7</sup>

In England the same principle was partially carried out; the heavy horse laid aside their armour, excepting cuirasses; they were mounted on horses of less weight than formerly, and they were supplied with carbines by King Charles II. In 1685, King James II. raised several independent troops of *Light Horse*, and one of them (Sir Thomas Burton's) was retained in his service until the Revolution in 1688, when it was disbanded. In 1691-2 King William III. constituted the Seventh Regiment

---

<sup>7</sup> *Histoire de la Milice Française*, par le Père Daniel.

of Horse, now Sixth Dragoon Guards, a corps of Carabineers, as an honorary distinction, and for the performance of services for which the other regiments of Horse, being Cuirassiers, were not well adapted. The object was to combine with strength and power a greater degree of activity and speed than was to be found in the Cavalry at that period; and His Majesty appears to have contemplated having several corps of this description in his service, as he designated this *the First Regiment of Carabineers*; but no second regiment was formed.<sup>8</sup> In 1694 a troop of foreign Hussars formed part of the Army commanded by King William in Flanders.<sup>9</sup>

During the wars of Queen Anne the Regiment of Carabineers was again supplied with cuirasses, and was mounted on the same description of horses as the other regiments; retaining, however, the title of Carabineers. The activity, size, weight, and strength of the horses ridden by the British Cuirassiers and Heavy Dragoons, with the bravery and muscular powers of the men, established their superiority in continental warfare over the Cavalry of other nations; they acquired great celebrity in the valley of the Danube and on the plains of the Netherlands, in the early part of the eighteenth century, under the renowned John Duke of Marlborough; and after the peace of Utrecht, in 1713, the reputation of the British Horse and Dragoons was so high

---

<sup>8</sup> National Records.

<sup>9</sup> The equipment of Hussars at this period is described by D'Auvergne, in his *History of the Campaign of 1694*, pp. 22, 23.

that no alteration was thought necessary, and many years elapsed without any attempt being made to revive the practice of having either Carabineers, or Light Horse, in the British Army.

The great utility of the Light Cavalry of the continental armies had, in the mean time, become apparent. Improvements in military tactics, and in the arming and equipment of corps, were taking place in various countries; and a spirit of emulation extending itself to Great Britain, on the breaking out of the rebellion in 1745, his Grace the Duke of Montague evinced his loyalty and public spirit by raising a Regiment of *Carabineers* for the service of King George II.; at the same time, his Grace the Duke of Kingston, with equal zeal and generosity, raised, at his own expense, a Regiment of *Light Horse*. The latter regiment approximated, in the lightness of the men, horses, and equipment, to the Hussars of the continental armies; the Duke of Montague's Carabineers were of a heavier description of Cavalry.

At this period the old Cavalry Regiments rode black horses (excepting the Scots Greys) with docked tails; but the Duke of Kingston's Regiment was mounted on light horses of various colours, with swish or nag tails. The accoutrements were as light as possible: the men carried short carbines slung to their sides by a moveable swivel, pistols, and light swords inclined to a curve.

The usefulness of the Duke of Kingston's Regiment of Light Horse was proved in Scotland, where it served under His Royal Highness the Duke of Cumberland, and was found qualified

for every description of service; the light horses traversing hilly grounds with facility. It distinguished itself on several occasions, particularly at the battle of Culloden, on the 16th of April, 1746, when it charged the clans with signal gallantry, and evinced great spirit and activity in the pursuit of the rebel army upwards of three miles from the field of battle. The Duke of Cumberland was highly pleased with its behaviour during the period it was under his command; and the conduct of the Light Horse throughout the contest reflected credit on the noble peer who had raised them.

The rebellion being suppressed, the regiment was, in consequence of the conditions on which the men had enlisted, directed to be disbanded; but the Duke of Cumberland so highly approved of its conduct that he obtained permission to embody as many of the men as would re-enlist, as his own Regiment of Light Dragoons.

His Majesty's thanks and particular satisfaction were communicated to His Grace the Duke of Kingston, for his zeal and affection for His Majesty's person and Government; and His Grace was desired to convey to the officers and soldiers His Majesty's high sense of their loyalty, activity, and gallant behaviour, at a period of national danger. The regiment was afterwards disbanded at Nottingham, and nearly every man engaged in the Regiment of Light Dragoons, of which, as a signal mark of honour and distinction, His Royal Highness the Duke of Cumberland was appointed Colonel.

The Duke of Cumberland's Light Dragoons were mounted on active nag-tailed horses, from fourteen and a half to fifteen hands high. The men were from five feet eight to five feet nine inches in height; and their equipment was upon a new and light plan, but retaining the cocked hat of the Heavy Dragoon pattern. This regiment served in the Netherlands, with the Army commanded by His Royal Highness the Duke of Cumberland: its general usefulness was fully established, and it distinguished itself at the battle of Val, in 1747. The treaty of Aix-la-Chapelle having put an end to the war, it returned to England, and was disbanded in 1749.

From this period the value of light horsemen was more appreciated in England than formerly; the general utility of this arm, on home and foreign service, had been fully proved; and at the commencement of hostilities with France, in 1755, King George II. resolved to possess the advantage of a body of Light Cavalry in the approaching contest. His Majesty accordingly commanded *a troop of Light Dragoons* to be added to the First, Second, and Third Regiments of Dragoon Guards, and First, Second, Third, Fourth, Sixth, Seventh, Tenth, and Eleventh Regiments of Dragoons. The First, Second, Third, and Fourth Irish Horse (now Fourth, Fifth, Sixth, and Seventh Dragoon Guards), and the Fifth, Eighth, Ninth, Twelfth, Thirteenth, and Fourteenth Dragoons, being on the Irish establishment, did not receive the same addition.

These troops of Light Dragoons were mounted, armed,

equipped, and trained, according to specific instructions, calculated to render them available for the services for which they were designed. Several of them were reviewed in Hyde Park by His Majesty; and their neat appearance, celerity of movement, and the spirited and exact manner in which they performed their evolutions, were much admired.

Nine of these troops were formed into a brigade in 1758, under the command of one of the King's aides-de-camp, Colonel George Augustus Eliott, of the Horse Grenadier Guards; and they were employed in the expeditions to the coast of France under Charles Duke of Marlborough and Lieut. – General Bligh. They landed in France twice; skirmished with the French Cavalry; and throughout these enterprises they evinced activity, spirit, and general usefulness. After their return to England, they were augmented to 125 men per troop.

At this period, the war on the Continent had involved most of the European states; and the extended and active operations which were taking place in Germany rendered it necessary for a British force to join the Allied Army under Prince Ferdinand of Brunswick. This gave rise to a further augmentation of the Army; and the increased estimation in which Light Cavalry was held induced the King to give directions for the raising of *entire Regiments of Light Dragoons*, in addition to the five Regiments of Horse, three of Dragoon Guards, and fourteen of Dragoons, already on the British and Irish establishments. The following corps were accordingly embodied: —

## **Light Dragoons**

### **Incorporated in 1759**

Fifteenth, in England, by Colonel George A. Eliott; – now the Fifteenth, or the King's Hussars.

Sixteenth, in England, by Lieut. – Colonel John Burgoyne; – now the Sixteenth, or the Queen's Lancers.

Seventeenth, in Scotland, by Captain Lord Aberdour; – disbanded in 1763.

Eighteenth, in England, by Lieut. – Colonel John Hale; – now the Seventeenth Lancers.

Nineteenth, in Ireland, by Lieut. – Colonel Lord Drogheda; – numbered the Eighteenth in 1763; constituted Hussars in 1807; and after performing much valuable service at home and abroad, it was disbanded at Newbridge, in Ireland, in 1821.

### **Incorporated in 1760**

Twentieth, in Ireland, by Captain Sir James Caldwell; – disbanded in 1763.

Twenty-first, or Royal Foresters, in England by Lieut. – General the Marquis of Granby, and Colonel Lord Robert

Sutton; – disbanded in 1763.

After the peace of Fontainebleau, three of these corps were disbanded, and the other four continued in the service. The light troops attached to the heavy regiments were also disbanded, but a few men of each troop were afterwards equipped as Light Dragoons.

A more perfect knowledge of the efficiency and capabilities of Light Cavalry, acquired during the campaigns in Germany and Portugal, had advanced the estimation in which that arm was held; and, in 1768, the Twelfth Dragoons (one of the heavy regiments raised by King George I. in 1715), underwent a change of equipment and clothing, and was constituted a corps of *Light Dragoons*, by General Carpenter, in Ireland.

This alteration served as a precedent for subsequent changes; and further experience, during the American war, from 1775 to 1783, con[Pg xxviii]firming the value of Light Cavalry, the Seventh, Eighth, Ninth, Tenth, Eleventh, Thirteenth, and Fourteenth Regiments of Dragoons were changed from *heavy* to *light*. The Light Dragoons attached to the heavy regiments were incorporated into newly-raised corps, and the following regiments of

## **Light Dragoons**

### **Were embodied in 1779**

Nineteenth, – by Major-General Russell Manners; – disbanded in 1783.

Twentieth, – by Major-General Richard Burton Phillipson; – disbanded in 1783.

Twenty-first, – by Major-General John Douglas; – disbanded in 1783.

Twenty-second, – by Lieut. – Colonel John Lord Sheffield; – disbanded in 1783.

### **Embodied in 1781**

Twenty-third, – by Lieut. – General Sir John Burgoyne, Baronet, for service in India, and was numbered the Nineteenth after the peace in 1783. This regiment signalized itself on numerous occasions in India, and was rewarded with the honour of bearing on its guidons and appointments the *Elephant*, with the words *Assaye* and *Seringapatam*. The word *Niagara* was also added in commemoration of the gallantry of two troops, in the year 1813, in North America. In 1817 it was constituted a corps

of Lancers. It was disbanded in Ireland in 1821.

Thus a few years had produced a great change in the British Army. Twenty-five years previously to the termination of the American war there was not a single Light Dragoon Regiment in the Service, and in 1783 there were seventeen; four of them were disbanded at that period, and thirteen retained in the Service.

Soon after the termination of the American war, the French monarch having, by aiding the rebellious British provincials, taught his own subjects a lesson of insubordination, was deprived of the reins of government; and the violent conduct of the French revolutionists in the West Indies occasioned the Twentieth or Jamaica Regiment of Light Dragoons to be raised in 1791 by Colonel Henry F. Gardner, for service in that island. Besides its services in Jamaica, detachments of this regiment served at Malta; Sicily; at the taking of the Cape of Good Hope, in 1806; at the capture of Alexandria, in 1807; at the attack on Monte Video; in Portugal; at Genoa; and on the eastern coast of Spain; and acquired the honour of bearing the word *Peninsula* on its guidons and appointments. It was disbanded in Ireland in 1818.

War with France commenced in 1793, and was followed by augmentations to the Army. It was not found necessary to add a single Heavy Cavalry Regiment; but the following Regiments of

## **Light Dragoons**

### **Were incorporated in 1794**

Twenty-first, – by Lieut. – Colonel Thomas R. Beaumont. This regiment served at the Cape of Good Hope and in India thirteen years; a detachment was sent to do duty at St. Helena, when Napoleon Buonaparte was removed thither. This regiment was disbanded at Chatham in 1820.

Twenty-second, – by Major-General William Viscount Fielding; – served in Great Britain and Ireland; – disbanded in 1802.

Twenty-third, – by Colonel William Fullerton; – served in Great Britain and Ireland; – disbanded in 1802.

Twenty-fourth, – by Colonel William Loftus; – served in Great Britain and Ireland; – disbanded in 1802.

Twenty-fifth, – by Major-General Francis Edward Gwyn. This regiment was numbered the Twenty-second after the Treaty of Amiens in 1802. It served with reputation in India; was employed at the reduction of Java; signalized itself on several occasions; and was rewarded with the royal authority to bear the word *Seringapatam* on its guidons and appointments. It was disbanded in England in 1820.

## Raised in 1795

Twenty-sixth, – by Lieut. – General R. Manners; – numbered the Twenty-third in 1803. This regiment served in Egypt, Portugal, Spain, Flanders, and France; and its distinguished conduct was rewarded with the honour of bearing on its guidons and appointments, the *Sphinx*, with the words *Egypt*, *Peninsula*, and *Waterloo*. In 1816 it was constituted a corps of Lancers. It was disbanded in England in 1817.

Twenty-seventh, – by Major-General Wynter Blathwayte; – numbered the Twenty-fourth in 1804. This regiment served in India, distinguished itself at the battles of Ghur and Delhi, and was permitted to bear the *Elephant*, with the word *Hindoostan*, on its guidons and appointments. It was disbanded in England, on its arrival from Bengal, in 1819.

Twenty-eighth, – by Major-General Robert Lawrie; – served in Great Britain, Ireland, and at the Cape of Good Hope; – disbanded in Ireland in 1802.

Twenty-ninth, – by Major-General Francis Augustus Lord Heathfield; – numbered the Twenty-fifth in 1804. This regiment served in India, and was at the reduction of the Isle of France. It was disbanded at Chatham, on its arrival from India, in 1819.

*Raised in 1794.*

Thirtieth, – by Lieut. – Colonel J. C. Carden; – disbanded in 1796.

Thirty-first, – by Lieut. – Colonel William St. Ledger; – disbanded in 1796.

Thirty-second, – by Lieut. – Colonel H. J. Blake; – disbanded in 1796.

Thirty-third, – by Lieut. – Colonel J. Blackwood; – disbanded in 1796.

Soon after the re-commencement of hostilities with France in 1803, the Seventh, Tenth, Fifteenth, and Eighteenth Light Dragoons were equipped as Hussars. Since the termination of the war in 1815, the Third and Fourth Dragoons have been changed from *heavy to light*; the Ninth, Twelfth, Sixteenth, and Seventeenth Light Dragoons have been constituted Lancers; and the Eighth and Eleventh Light Dragoons have also been equipped as Hussars.

At this period (1847), the Cavalry of the British Army consists of twenty-six regiments – thirteen Heavy and thirteen Light; and is composed of three regiments of Cuirassiers, ten of Heavy Dragoons, four of Light Dragoons, five of Hussars, and four of Lancers.

# **HISTORICAL RECORD OF THE THIRD, OR THE KING'S OWN, REGIMENT OF LIGHT DRAGOONS**

1685

James the Second ascended the throne of England on the 6th of February, 1685, and four months only had elapsed, when his nephew, James Duke of Monmouth, erected the standard of rebellion on the western coast, and, having been joined by upwards of three thousand men, proclaimed himself king. To oppose Monmouth and his rash adherents, the King obtained from Parliament a grant of four hundred thousand pounds, and augmented the strength of his army. Among the loyal yeomen and artisans who arrayed themselves under the banners of their sovereign, a number of young men from Berkshire, Middlesex, Herts, and Essex, were formed into five independent troops of Dragoons under Captains Richard Leveson, John Williams, Thomas Hussey, Edward Lea, and Francis Russel. These five troops, with an old independent troop of Dragoons, commanded by Colonel Strather, were attached to the Royal Dragoons under John Lord Churchill, (afterwards the great Duke of Marlborough,) whose regiment was thus augmented to nine

hundred men, and from these additional troops the corps which now bears the distinguished title of the "Third, or King's Own Regiment of Light Dragoons," derives its origin.

Captain Russel's troop rendezvoused at Chelsea and Knightsbridge, and having been speedily mounted and equipped, it was attached to the three Scots regiments of foot which had arrived from Holland, and ordered to join the army; but the insurgent bands having been overthrown at Sedgemoor on the 6th of July, it halted at Bagshot; and proceeding to London on the 13th, was present at the execution of the Duke of Monmouth on the 15th of that month.

Although the insurrection was thus speedily suppressed, and the executions which followed were sufficiently numerous to intimidate the disaffected, and prevent a second appeal to arms of a similar character, yet the King resolved to retain a considerable number of the newly-raised forces in his service. On the 17th of July several troops of Dragoons were formed into a regiment, (now the fourth light dragoons,) under the command of Colonel John Berkeley; and in the beginning of August, four of the additional troops attached to the royal dragoons, with one troop from Berkeley's regiment, were incorporated; at the same time another troop was ordered to be raised, and the six were constituted a regiment of which His Grace the Duke of Somerset was appointed Colonel, and Alexander Cannon, from a regiment of foot in the Dutch service, Lieutenant-Colonel, by commission dated the 2nd of August, 1685. The regiment thus formed is

the subject of this memoir; its Colonel being Lord-Lieutenant of Somersetshire, had commanded the militia of that county during the rebellion, and his regiment was honoured with the title of the "Queen Consort's Regiment of Dragoons;" and being composed of troops raised previously to those of Berkeley's regiment, it obtained precedence of the last-mentioned corps<sup>10</sup>.

1686

The establishment was fixed by warrant under the sign manual, bearing date the 1st of January, 1686, from which the following is an extract.

#### THE QUEEN CONSORT'S REGIMENT OF DRAGOONS.

Thomas Hussey	William Hussey	Peter Sutherland
Oliver St. George	Francis Tankard	Rupert Napier
Henry Packhurst	Chaplain	
James Barry	Adjutant.	
Noe L'Evesque	Chirurgion.	

1687

During the summer the regiment was encamped on Hounslow Heath, where it was reviewed by the King; it was also encamped on the same ground in the summer of 1687; and took part in several mock-engagements, which were exhibited by an army of upwards of ten thousand men, in presence of their Majesties, and a numerous concourse of people.

1688

The King, having openly declared himself a Roman Catholic, resolved to give public audience to a nuncio from the Pope, Ferdinand d'Adda, who had been consecrated Archbishop of Amasia in the King's Chapel at St. James's, and the Duke of Somerset, who was Lord of the Bedchamber in waiting, was directed to attend the legate into His Majesty's presence. This command his Grace refused to obey, with a laudable firmness which astonished the King, alleging the laws of England made

such attendance treason; he was consequently deprived of his regiment and of his post at court. The King conferred the Colonelcy on the Lieutenant-Colonel, Alexander Cannon, under whom it was again encamped on Hounslow Heath.

While pursuing a course of tyrannical and ill-advised measures against the laws and religion of the country, the King learnt with astonishment and indignation, that the Prince of Orange was embarking an army for England to aid the noblemen and gentlemen who were opposed to papacy and arbitrary government; the Queen's Dragoons, with several other corps, were ordered to Ipswich, under the command of Major-General Sir John Lanier, to endeavour to preserve Landguard fort, and to oppose the Prince if he should attempt to land there. His Highness, however, landed at Torbay on the 5th of November, 1688, when the regiment was ordered to Salisbury, and from thence to Warminster, where the advance-post of the King's army was established.

While the regiment was stationed at Warminster, the Lieutenant-Colonel, Richard Leveson, Captain St. George, with several other officers and a number of men, being stanch Protestants and zealous advocates for their religion, and for the welfare of their country, quitted their post and joined the Prince of Orange. The remainder of the regiment continued with King James' army and retreated towards London. His Majesty having quitted England and retired to France, the regiment was re-united at Dunstable, and the Prince of Orange conferred

the colonelcy on Lieutenant-Colonel Leveson, in succession to Colonel Cannon, who adhered to the interest, and followed the fortunes of King James.

1689

On the accession of King William III. and Queen Mary, the Regiment did not lose its title of "The Queen's," but that designation was not used, and numerical titles not having been then introduced, it was usually styled Leveson's regiment; it was, however, again called "The Queen's," after its return from Ireland in 1692.

Under its new sovereign the regiment was quickly employed in active service. King James proceeded from France to Ireland, and finding an army, levied by Earl Tyrconnel, ready to support the Roman Catholic interest, he soon reduced the greater part of that country to submission to his authority. King William sent the veteran Duke Schomberg with an army to Ireland, to rescue that country from the power of papacy; and Leveson's dragoons embarked at Highlake on the 21st of August, for the same destination. Having landed near Carrickfergus, they joined Duke Schomberg's camp a mile beyond Belfast, on the 30th of August, and were reviewed on the following day.

The army quitted Belfast on the 2nd of September, and advancing towards Newry on the 3rd, found the town in flames, and the enemy fled; Leveson's troopers and some Inniskilling horse, rode forward in pursuit, but were unable to overtake the rear of the fugitive army.

A camp was afterwards formed at Dundalk, and, on the 13th of September, as a party of the regiment was cutting forage in the fields, a detachment of the enemy appeared; the dragoons instantly threw down their forage and advanced to meet their opponents, who, though superior in numbers, faced about and retired. On the 21st of September the enemy appeared in force, displaying their royal standard, but retired without venturing to attack the camp; when a party of Leveson's Dragoons galloped forward in pursuit, and overtaking the enemy's rear, killed five men. On the 17th of October, as a detachment of the regiment and some Inniskilling horse, were reconnoitring, they advanced with great audacity to the immediate vicinity of King James' camp, and a party of Irish horse gained a pass in their rear to cut off their retreat; but the gallant dragoons, by a determined charge forced their way through the defile, killed four opponents, and brought off six prisoners.

These instances of bravery gave Duke Schomberg a high opinion of the regiment, and about midnight on the 27th of October, he sent out two hundred of Leveson's troopers with some Inniskilling horse and French protestants, who dashed across the country to the neighbourhood of *Ardee*, routed the enemy's out-guards, and captured a drove of oxen and some horses, with which they returned in triumph to the camp at Dundalk.

In November the army went into winter quarters in the north of Ireland, and a party of Leveson's troopers was stationed at

a frontier post at Tandrogee. On the 26th of November, sixty men of the regiment accompanied Colonel Cambron, while making a reconnoissance of the enemy's post at *Charlemont*; when they discovered a party from the garrison posted in the hedges near the place. The Dragoons, with their characteristic intrepidity, dismounted, drove the enemy from the hedges in gallant style, killed seven men upon the spot, and captured two Irish musketeers, twenty horses, and a number of cattle, with the loss of one man who was killed by a shot from the town, and eight men, whose ardour led them too forward in the pursuit, and who were surrounded and made prisoners.

1690

In February, one squadron of the regiment formed part of a reconnoitring party under Major-General Sir John Lanier; and on arriving in the vicinity of Dundalk, Leveson's dragoons dismounted, – stormed *Bedloe's Castle*, – killed ten of the garrison, – took the remainder prisoners, – and burnt the building. The same party captured about fifteen hundred head of cattle, and afterwards returned to Newry, – having lost one lieutenant, three dragoons, and four horses, killed, in this expedition.

Although no general engagement had occurred, Leveson's dragoons, by their spirited conduct on all occasions, had become celebrated in the army; Colonel Leveson was foremost on every occasion of danger, the men were proud of their commander, and the character of the corps was already established, when

King William III. arrived in Ireland to command the Army in person. His Majesty landed at Carrickfergus on the 14th of June, and proceeded from thence to Belfast, where he was met by the principal officers of the army. Leveson's troopers were, at this time, at Newry, with a division of the army commanded by Major-General Kirke; and on Sunday, the 22nd of June, a squadron of the regiment, under the orders of Captain Crow, and a company of Kirke's (now second) foot, commanded by Captain Farlow, were ordered forward to reconnoitre the enemy's camp at Dundalk.

1690

This party was on the march at an early hour, and having advanced through a pass, to the grounds where the enemy had erected a fort in the preceding campaign, but had afterwards abandoned it, they were suddenly saluted by a volley from some infantry who had concealed themselves in the fort; at the same time five hundred of the enemy's horse were seen through the misty dawn advancing to charge them. Never were men in greater danger than that to which this little band was exposed; Leveson's troopers, being in advance, stood their ground boldly, but were driven back by the superior numbers of their antagonists. The enemy's horsemen being checked by the fire of Farlow's musketeers, the dragoons returned to the charge and used their broad swords with good effect; the pikemen joined in the charge and the Irish were driven back; but not knowing the numbers of their opponents, the dragoons and pikemen retired through

the pass in good order. The loss on this occasion was twenty-two men killed and several wounded, and Captain Farlow, who commanded the foot, was taken prisoner. The enemy's loss was greater, and their Commanding Officer was killed by one of Leveson's troopers. Another party of the regiment was sent forward on the following morning, and ascertained that the enemy had left the camp at Dundalk, and were retreating towards Ardee.

King William advanced through Dundalk to Ardee, which town he entered as the enemy's rear-guard abandoned the place. On the 30th of June he arrived at the river *Boyne*, and Captain Pownell, of Leveson's dragoons, was sent with a squadron to take post near Slane-bridge. King James' army was strongly posted on the opposite bank of the river, with his right near Drogheda and his left extending towards the village of Slane.

On the 1st of July the river was crossed at three places, and a general engagement was fought. After a severe struggle the enemy retreated to the village of Donore, where they made such a determined stand that the Dutch and Danish horse, though headed by the King in person, gave way; when a squadron of Leveson's dragoons, commanded by Captain Brewerton, and a party of Sir Albert Cunningham's dragoons (the sixth Inniskilling) dismounted, and, lining the hedges, and an old house, 'did such execution upon the pursuers as soon checked their ardour.' At the same time Colonel Leveson, with the remainder of his regiment, galloped forward, and, with

admirable bravery, interposed between the enemy's horse, and the village of Duleck. King William's horse having rallied and returned to the charge, the enemy retreated, when they were attacked in the rear by Colonel Leveson with his dragoons, who made great slaughter. The Irish abandoned the field with precipitation; but their French and Swiss auxiliaries retreated in good order.

King James returned to France, yet the war was continued in Ireland. On the 22nd of July, Leveson's dragoons proceeded, with other forces, to *Waterford*, and invested the town. The garrison surrendered on the 25th, and was conducted to *Youghal* by a troop of the regiment under Captain Pownell. Having delivered up his charge, the captain, representing to the governor the ruin he would bring upon himself if he held out, induced him to deliver up the place; and it was taken possession of the same night by the dragoons, who found fourteen pieces of cannon, 350 barrels of oats, and some provisions, in the town. This troop remained in garrison at *Youghal*, with a company of foot; and the commanding officer, having heard that bands of armed Roman Catholic peasantry, called Rapparees, were committing ravages on the Protestants, marched out with thirty-six dragoons and fifty foot. The dragoons were in advance, and when they arrived near *Castle Martir*, they encountered three hundred rapparees. Notwithstanding the disparity of numbers, the gallant dragoons dashed forward sword in hand, – broke in upon the enemy, – sabred sixty upon the spot, and took seventeen prisoners. The

foot having come up, the castle was summoned, and the troops in the garrison delivered it up on condition of being allowed to march unmolested to Cork, without horses and arms. The captain gave the arms to the Protestant inhabitants, and took the horses with him to Youghal.

At this time the remainder of the regiment was engaged in the siege of *Limerick*, which failed, owing to the loss of the battering train. From Limerick the five troops marched with other corps towards *Birr*, to relieve the castle, which was besieged by the enemy; and, after performing this service, encamped beyond the town.

On the 16th of September one troop of the regiment attacked an immense number of rapparees who were proceeding from Cork to Lismore, and having routed them and killed forty, took three prisoners. Two days afterwards, as Lieutenant Kelly of the regiment was out with a small party reconnoitring, he was surrounded and taken prisoner.

1691

The regiment passed a part of the winter at Clonmel, and in February 1691, it was employed on an expedition to *Streamstown*, when the advanced guard highly distinguished itself; and shortly afterwards its colonel, the gallant Leveson, was promoted to the rank of brigadier-general. In May it was encamped at Mullingar.

The Irish being strengthened from France, and the English from Scotland, both armies took the field in the beginning of

June, when General De Ginkell, who was left in command by King William, advanced through Mullingar, – captured Ballymore, and besieged Athlone, which was gallantly stormed and taken on the 30th of June. The town having been put in a posture of defence, the army advanced to Ballinasloe, and on Sunday, the 12th of July, advanced in four columns against the Irish, who were strongly posted near the village of *Aghrim*; their right flank and centre being covered by a morass, and the remainder of their front by enclosures, terminating at the castle of Aghrim, on which their left rested. Leveson's troopers were formed in brigade with the royal Irish dragoons commanded by Brigadier-General Villiers, and posted on the right of the line. The action was well contested on both sides. At length the Blues, Langston's, and Byerley's horse, a squadron of Ruvigny's French Protestants, and Leveson's dragoons, forced the pass at the castle of Aghrim, and, by a gallant charge, decided the fate of the day. Leveson's gallant troopers rushed forward with their wonted bravery, and overthrew all opposition. In opposing this attack in person, the enemy's general, St. Ruth, was killed by a cannon ball, and the Irish giving way, were pursued with great slaughter by the cavalry towards Loughrea. The regiment was thanked by the Commander-in-Chief for its excellent conduct. It lost in this action seven men killed, and five wounded.

Leveson's dragoons were afterwards employed in the siege of *Galway*. On the 2nd of August they were detached, with twenty-four men from each regiment of Horse, under the command of

Brigadier-General Leveson, to scour the country and drive in the enemy's parties; and they arrived on the 4th, in the vicinity of *Nenagh*, where five hundred of the enemy, under Brigadier-General Carrol (commonly called Tall Anthony) were in garrison in an old castle, on the domain of the Duke of Ormond. Part of the garrison occupied a pass half a mile in front of the castle; but was driven from that post by the dragoons. The garrison made a precipitate retreat towards Limerick, but were overtaken at *Cariganlis*, and routed with the loss of several men, their baggage, and four hundred head of cattle.

The siege of *Limerick* commenced on the 25th of August, and the regiment was before the town until the 31st, when it was detached with a party of horse under Brigadier-General Leveson, and Major Wood of the eighth horse (now sixth dragoon guards) to reduce the small garrisons in the county of Kerry, where the whole country was found in arms, and Lords Merrion's and Bretta's regiments of Irish horse there to assist the rapparees. Leveson and Wood<sup>11</sup> were both daring aspirants for military fame, and had become celebrated for their zeal and valour, and for their abilities on detached services. – Having ascertained where the two Irish regiments were encamped, they marched all the night of the 1st of September; and about one on the following morning, rushed suddenly upon them with the horse and dragoons. The enemy, surprised and confounded, fled in

---

<sup>11</sup> Major Wood rose to the rank of lieut. – general. See a memoir of this distinguished officer in the record of the third dragoon guards.

every direction, pursued by the victorious dragoons, who sabred many men and captured a drove of oxen. A reinforcement of three hundred horse and dragoons and six pieces of cannon was afterwards sent to Brigadier-General Leveson, and he reduced several garrisons between Cork and Limerick, and sent numbers of oxen and sheep to the army. On the 22nd of September this gallant officer, with only two hundred and fifty horse and dragoons, attacked and dispersed two regiments of Irish dragoons and a body of rapparees nearly three thousand strong; when he again captured some cattle and sheep. It appears that the principal part of the provisions for the army encamped before Limerick was supplied by the activity of Leveson's corps, which continued to act as an independent force until the surrender of that city on the 3rd of October. In King James's declaration from St. Germain's, Brigadier-General Leveson was especially exempted from the general amnesty.

1692

1693

With the fall of Limerick ended the war in Ireland<sup>12</sup>; and the regiment having embarked for England, landed at Barnstaple on the 18th of March, 1692. Its establishment was six troops, 360 men, and its expense 15,999*l.* 3*s.* 4*d.* per annum. During this

---

<sup>12</sup> The account of the services of the regiment in Ireland has been taken from the Official Records – London Gazettes – Accounts published by authority in 1690, and 1691 – State of Europe – Story's History of the War in Ireland – Harris' Life of King William III. – and Boyer's Life of King William III.

and the following year it was stationed in the south and western counties of England.

1694

On the 19th of January, 1694, Brigadier-General Leveson was removed to the third horse, now second dragoon guards; and the colonelcy of the Queen's dragoons was conferred upon Thomas, Lord Fairfax, from lieut. – colonel of the second troop (now second regiment) of life guards.

At this period King William was engaged in a war with France, and the third horse and Queen's dragoons having been reviewed by His Majesty in Hyde Park, on the 26th of March embarked for foreign service. The Queen's dragoons landed at Williamstadt, in North Brabant, on the 16th of April 1694, joined the army encamped at Tirlemont on the 21st of June, and was again reviewed by His Majesty on the following day. Its excellent conduct in Ireland appears to have raised the regiment high in the King's estimation, and it was ordered to encamp beyond the defiles of the village of Roosebeck, to cover His Majesty's quarters<sup>13</sup>.

The regiment served the campaign of this year in brigade with the royals and royal Scots dragoons, and was employed in manœuvring and skirmishing in the valleys of Brabant and in the verdant plains of Flanders. No general engagement occurred, and in October it went into quarters at Ghent.

---

<sup>13</sup> D'Auvergne's History of the Campaign in Flanders.

In February, 1695, Lord Fairfax having retired, King William conferred the colonelcy on Colonel *William Lloyd*: at the same time the establishment was augmented to eight troops of thirty-eight officers, seventy-two non-commissioned officers, and four hundred and eighty privates, the annual expense being increased to 20,652*l.* 18*s.* 4*d.*

Having passed the winter in barracks at Ghent and received a remount from England, the Queen's dragoons marched, in April 1695, to Dixmude in West Flanders, and encamped on the plains of the Yperlee. A small detached corps was assembled at this place under Major-General Ellemberg, and in June an attack was made on the forts at Kenoque, to draw the French troops that way, and to facilitate the siege of Namur, which was undertaken immediately afterwards.

The Queen's dragoons, with eight battalions of infantry, returned to Dixmude, and the remainder of the division marched to the main army before Namur.

While the army was besieging Namur, a French force, commanded by General de Montal, invested Dixmude (15th July), and carried on the approaches with great expedition. The governor, Major-General Ellemberg, called a council of war, and suggested the expediency of surrendering. This was opposed by Major Beaumont, who commanded the Queen's dragoons<sup>14</sup>,

---

<sup>14</sup> Colonel Lloyd being sick at Brussels and the Lieutenant-Colonel on leave of absence.

and some other officers, but it was agreed to by the majority, and the garrison was delivered up prisoners of war. Thus, the gallant dragoons, after displaying the greatest valour in former campaigns, were tamely consigned into the hands of the enemy, by a timid, or treacherous, foreign general officer. The soldiers were enraged at not being permitted to defend the place; many of the men broke their arms before they delivered them up, and one British regiment tore its colours to pieces.

An agreement had previously been made by the contending powers, that all prisoners should be given up on certain conditions. These conditions were complied with, and the return of the regiments which had surrendered, was demanded; but the French court refused to give them up. At length the citadel of Namur capitulated, and the French garrison was permitted to march out without being made prisoners, but as they passed through the allied army, their commander, Marshal Boufflers, was arrested and detained until the conditions of the agreement were complied with. The detention of the marshal produced the release of the regiments; the Queen's dragoons returned to the army, and were ordered into barracks at Ghent. At the same time a general court-martial assembled for the trial of the officers who had delivered the regiments into the power of the enemy. The governor of Dixmude, Major-General Ellemberg, was sentenced to be beheaded, and was executed at Ghent on the 20th of November. Colonels Graham, O'Farrell, Lesly, and Aver, were cashiered; two others were suspended, and the remainder

acquitted. After the army left the field, the Queen's dragoons were quartered in villages near the canal of Sluys.
