# Horoscope of Jesus Christ

## What facts we have today

1. The Christian era begins, as we know, from the Christmas proposed by the Scythian monk Dionysius Lesser, and this decision was adopted by a decree of Pope John I. Dionysius said that Jesus was born in 753 since the founding of Rome, so the next year, according to the count of the Romans was

the 1st of January in 754 and it was named as the first year of the Christian era. Dionysius used in his calculations the Gospel of Luke. The baptism of Jesus by John was:

*“in the fifteenth year of the reign of Tiberius Caesar, Pontius Pilate being governor of Judaea, and Herod being tetrarch of Galilee, and his brother Philip tetrarch of Ituraea and of the region of Trachonitis, and Lysanias the tetrarch of Abilene” (Luk 3.1)*

Tiberius became the second emperor and ruler of the Roman Empire from 14 AD and if Jesus Christ in the 15th year of the reign of Tiberius was 30 years old, Luk (3.23)” And Jesus himself began his ministry being about **“thirty years of age”**, so Jesus was born in the first year BC (i.e. a total of seven days before the zero year, thirty years is very vague – at least 28 or 32 years old).

2. Leading Theologians who study the New Testament consider the birth of Jesus was between 8th and 4th years BC. At the present time, none of the major Ministers of the Church claim that our calendar is counted from the birth of Jesus Christ.

3. Almost all astrologers accept the calculations of the astronomer Johannes Kepler, who calculated that the birthday of Jesus was in the 7th year BC, which are based on the conjunction of Jupiter and Saturn in Pisces, supposedly such conjunction occurred when Zoroaster (3784 BC) and Buddha (623 BC) were born.

4. The birthday of Jesus at midnight 24th to 25th of December

is accepted by practically takes almost everybody. Long before our era, almost all ancient peoples celebrated the birthday of their Sun Gods on this day. Adonis, Bacchus, Osiris, Apollon – were born on the 25th of December. Christmas comes during the winter solstice, when the days become shorter, and Darkness spreads across the “face” of the Earth more than ever. According to the beliefs, *“all the solar Gods were born at this time of the year, because from that day on, their Light growing stronger and stronger disperses the darkness, and the power of the Sun with every coming day begins to grow”*.

**Let's check if it is so.**

Many truths can be understood only when you are in solitude, at a certain level of spiritual development, free from the shackles of mass consciousness and all prejudices. **“Science of the Gods can be taken only by force, it must be won, and not given itself.”**

Dear readers, if you are not able to follow common sense, do not read further, please, in order to avoid the surge of negative emotions with the possibility of shock and even an infarct. You have been warned by me, therefore I am away from responsibility for possible consequences.

# The history of the census referred to by Luke

Many researchers put trust in the Gospel information about the census, and they are based on this fact, take the year 7 BC as the year of Jesus' birth.

*Luke (2.1)" And it came to pass in those days, that there went out a decree from Caesar Augustus that all the world should be taxed. And this taxing was first made when Cyrenius was governor of Syria. And all went to be taxed, every one into his own city. And Joseph also went up from Galilee, out of the city of Nazareth, into Judaea, unto the city of David, which is called Bethlehem; (because he was of the house and lineage of David;) | To be taxed with Mary his espoused wife, being great with child".*

Do you think it is normal that Joseph's family went from Nazareth to Bethlehem for the census, to walk for 160 km? You would think they had no nothing else to do. But they were of ordinary working people, rather than the Roman nobility which were having many slaves who grew garden plants for them. And Mary, meanwhile, had been pregnant for at least 9 months, then how this distance they could walk in a week, maximum for the month. Is someone reading these terms, under such case, would go to the census even in a car? For this trip they should have a strong reason. Perhaps it was nothing like the persecution

of King Herod.

During the reign of Augustus there were three Censuses in the Roman Empire: 28 BC, 8 BC and 14 AD (according to some sources – 7 BC and 13 AD). The census played a huge role, and Augustus ordered to conduct it every five years in Rome for those who had Roman citizenship and were residents of Rome and more than one time in all the other provinces of the empire. Censuses were not held on a particular day, but distributed in time.

There is some information that Publius Sulpicius Quirinius (51 BC – 21 AD), became Procurator of Syria only about 6th or 7th AD and he was not the governor of Syria in 7 BC, but Augustus appointed him the Authorized person to lead to this well known census. There is an inscription in Latin on the stone found in 1764 in Tivoli (ancient Tibure) near Rome, but without specifying the date. The inscription evidenced a double reign of Quirinius. Even the researchers of the Gospels say that the word **πρῶτος** in the proposal for a census (Luke 2.1) is not only **“the first”**, but the meaning **“before”**:

«αὕτη ἡ ἀπογραφὴ πρώτη ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρηναίου.  
«And this taxing was first made when Cyrenius was governor of Syria» (Luke 2.2)

«Ὁ ὀπίσω μου ἐρχόμενος ὑπὲρ πάντων μου γέγονεν, ὅτι πρῶτός μου ἦν.»  
«He that cometh after me is preferred before me: for he was before me». (John 1.15)

«Εἰ ὁ κόσμος ὑμᾶς μισεῖ, γινώσκετε ὅτι ἐπὶ πρῶτον ὑμῶν μίσησεν.»  
«If the world hate you, ye know that it hated me before it hated you» (John 15.18)

Such an explanation refers simultaneously to about two censuses and establishes their chronological relation. And if you use the translation that the census was before the first generally accepted reign of Quirinius, this could be up to 6 AD. This information is very contradictory, but it would be wrong to say for sure that the census didn't take place.

# How history is written

All these contradictions come from the politicians constantly interfering in the historians work and practically any history is written under the dictation of the ruling persons and classes. There is no secret that history has been distorted many times. The history of Russia had been written by Germans within their interests, M. V. Lomonosov struggled with this, but not too successfully. In the Soviet Union all the facts about the time before the revolution were distorted. At present everyone sees how the history of Ukraine is being written.

After Nicaea and Constantinople Councils much of the teachings of Jesus Christ were removed and the texts of the Gospels have been greatly distorted by “Holy Church”. The historical documents about these facts are hidden from mankind forever, and probably we will never see the origin of the Gospel.

Not all those who speak about God are pastors. And instead of to serve the Truth, religious ministers or cult servants are doing everything to discredit true Doctrine. **The Church established a monopoly on God. By what law does it do?** Their basic idea is that to God one can only come through them, if you follow for all the Church regulations. And all the true mixes with the dirt, so this fact pushes away many sincere seekers. It is a pity that the Apostle John threatened, the scribes for the distortion of the “Apocalypse” too late:

*Rev (22.19)” And if any man shall take away from the words of the book of this Prophecy, God shall take away his part out of the book of life, and out of the holy city, and from the things which are written in this book”.*

*“By cosmic measures it has been a very short time from the time that my Teaching was given. However, misrepresentations made by many people distorted the original sense, so much that even I can hardly guess the correct meaning of the phrases left recorded in the Gospels. My epistle was much broader than the interpretation my disciples were able to grasp and record. Subsequent editors kept distorting the text continuously. Many of them sincerely intended to convey the contents in a better way, naturally, to their understanding. Many provisions of the Teaching given by me totally did not fit in with other peoples’ concepts, and they were silently deleted. That’s why just three hundred years after my leaving the physical plane, you received the Teaching only remotely resembling the true Teaching given by me. For comparison I can provide an example of a candle and the sun. That is the proportion of the essence of my Teaching in the present Christianity”.*

The argument just described in the words of [Jesus Himself](#) would be adopted not earlier than through two cycles of Jupiter from the time of this writing (in August 2015). There are other arguments – the works of H.P. Blavatsky, she hadn’t any education, but who gave us a huge amount of knowledge and information. That’s at least 10 books, each volume as large

the Bible, and these books are not detective novels. Where did she take it all? For Theosophists it is no secret that the real authors of the Theosophical literature, are precisely those Magi – Melchior, Balthazar and Caspar. But for many, this is not an argument. The even Gautama Buddha warned his listeners “*about the inadmissibility of forming opinions based on tradition or authority before completing the study of the subject*”.

*“Just as there are people, completely unable to study music, mathematics, etc., so there are those who are closed to certain areas of thought. His work will be distorted by critics, who, after having read three lines on the first page, two in the middle of the book, and the closing sentence, will proclaim it is ‘unreadable’; it will be mocked by the sycophants of science and the Church, it will be incorrectly cited by their lackeys, while the average reader will not understand its significance.”* Paul Zhibier.

**And so, the best test of all historical events – is their close’ liaison with astronomical phenomena referred to in the documents.** Using this rule, we will continue to.

# The year of Herod's death

The proof that Messiah was born between 8 and 4 BC is based on the information from the Gospel of Matthew (2.1), which states that Jesus was born during the reign of [King Herod](#) of Judea (the Great), (the most common date of the reign of Herod is 40 – 4 BC, but there is also 37—1 BC). Many authors of historical records were negatively disposed to Herod, due to his brutal, tyrannical activities, and of course, the percentage of objectivity cannot be proved.

Detailed descriptions of the life of Herod the Great are in the work of the historian [Josephus Titus Flavius](#) – “[Jewish Antiquities](#)”, where there are contradictions about the date of Herod's death. In conventional calculations, it turns out that his death was 4BC or 1BC.

Herod became the ruler after the capture of Jerusalem.

*“This destruction befell the city of Jerusalem when Marcus Agrippa and Caninius Gallus were consuls of Rome on the hundred eighty and fifth olympiad, the third month, on the solemnity of the fast, as if a periodical revolution of calamities had returned since that which befell the Jews under Pompey; for the Jews were taken by him on the same day, and this was after twenty-seven years time”. (Antiquities of the Jews – XIV, chapter 16.4)*

The 185th Olympiad was in 40 BC, and Pompey conquered

Jerusalem in 63 BC. After 27 years, will turn – 36 BC. And while here, in the same sentence immediately there are visible contradictions, lets try to rely on the above mentioned rule.

And Herod died from 37 years after the beginning of the reign: *“Then he had done these things, he died, the fifth day after he had caused Antipater to be slain; having reigned, since he had procured Antigonus to be slain, thirty-four years; but since he had been declared king by the Romans, thirty-seven”.* (Antiquities of the Jews – XVII, chapter 8.1)

Shortly before his death, there was an eclipse of the Moon

*“But Herod deprived this Matthias of the high priesthood, and burnt the other Matthias, who had raised the sedition, with his companions, alive. And that very night there was an eclipse of the Moon”.* (Antiquities of the Jews – XVII, chapter 6.4)

Josephus Flavius was not an astronomer, we can hardly believe that he had not the tables of astronomical phenomena, in order to write the history exactly according to astronomical events. But just as observant person, he expounded the astronomical events that were well known to all. But before the death of Herod there was a lunar eclipse (and this is a fact) and most probably many people had seen this eclipse – so it was a total lunar eclipse, because the partial eclipse looks like a regular moon phase and not everyone can see it. But in 4 years BC there were two lunar eclipses: first – on the 13th of March, the second – on the 5th of September and both were partial eclipses, and only

astronomers could know about this fact. But in 1st year BC, there were two total lunar eclipses on the 9th of January and on the 5th of July.

Consequently, **Herod died in the 1st year BC** and Jesus could have been born before that date and not before the 4th BC.

# Star of Bethlehem

The astronomical event, confirming the birth of the Savior was the so-called Star of Bethlehem, mentioned twice.

*Mat (2.1) "Now when Jesus was born in Bethlehem of Judea, during the time of King Herod, Magi from the East came to Jerusalem and ask*

*(2.2) "Where is the one who has been born King of the Jews? We saw his star in the East and are come to worship him". About the Star of Bethlehem there have been written many versions and it is not necessary to describe all of them, especially none of them has added clarity.*

Here are the main versions:

1. In 7 BC, there was the conjunction of Saturn and Jupiter in Pisces repeating three times – on the 29th of May, on the 1st of October and on the 5th of December. The conjunction of Saturn and Jupiter happens every 12 years in different signs, in Pisces it is once in 800 years.

2. In 6 BC, on the 26th of February there was the conjunction of the three planets: Mars, Saturn and Jupiter in Pisces. This conjunction happens once every 800 years. But that event was an astrological conjunction among the planets with 3° of longitude, Mars was in 27° Pisces, had a decline of -1.8°, Saturn was in 23°, Jupiter was in 24° Pisces.

declination  $-4.9^{\circ}$ , Jupiter  $30^{\circ}$ , declination  $1.17^{\circ}$ . In the sky these planets were visible as three separate spots (stars).

3. In 5 BC in Capricorn in the East there was a comet which was visible for 70 days. Let's analyze the facts:

1. There was no one in Jerusalem who had seen or heard about this Star before the arrival of the Magi.

2. The Magi had seen the star two times, and the character of sight was different.

3. The first time the star was in the East.

4. The second time the star went before them.

Modern science denies the existence of divine spirit in nature and divine origin in man. The scientists are easier to accept the theory of the origin of man from a common ape and to see a brother in a dumb tailless baboon, than to acknowledge the glorious "Sons of Gods". Religious leaders showed "higher love" for their brothers by burning scientists at the stake and hanging them on the rack.

Any religious person, for example the theologian, evangelist, cult minister, churchman or simple believer is short of the Faith, so they ask God about something all the time. The one who has the Faith gives himself into the hands of the Lord. And so religious people cling to any straw (mystical miracle) to confirm the presence of God and adjust the facts or the astronomical events to holy Scripture. There is God and there is a Holy Spirit and one of the best of humanity Sons – Jesus has not left us

up to this day. The astronomers are able to watch, but they do not use philosophical basis of astrology. The astrologers, it seems, do not watch the starry sky at all but use computers only. But, at that time astronomy and astrology, religion and science were inseparable in the persons of the Magi. So they could have predicted the birth of Jesus, using biblical prophecies (Micah 5.2) (Daniel 9. 23—27) and their own calculations, as they were wise men.
